- August 2014
11th @ 10:30am, 12th @ 7:30pm and
14th @ 10:30am.

Wheeling-Ohio County Health Department Information on Food Health Permits

As the spring and summer outdoor activity season approaches the Health Department would like to remind all organizations about food permits. If an organization or business is going to hold a public event where food is sold or given away they should contact the health department to obtain a permit and have the operation inspected before serving to the public. A food establishment includes restaurants, retail food stores, schools, grocery stores, nursing homes, hospitals, caterers, bars, day care centers, food

concession stands, churches, mobile food units, vending machines and various indoor and outdoor events. A permit is not necessary when selling pre-packaged food, such as candy or canned/bottled drinks. Permits are also not necessary for private or family events or limited bake sales (contact the health department for more information). In addition to the required Health Permit to operate, establishments must insure that all food service workers obtain a Food Handler's Card.
